JumpStart

IT SERVICES

Managed IT empowers businesses by outsourcing technology management to experts. JumpStart provides services like hardware support, security, application administration and strategic planning, so you can enhance security, minimize downtime and focus on your core goals.

ENHANCE YOUR OPERATIONS WITH TAILORED EXPERTISE

HARDWARE SUPPORT

Seamless support services for all common laptops, desktops, servers, printers and physical phones. Our team is just an email, chat or phone call away and helpdesk tickets can be entered with the click of a button.

APPLICATION SUPPORT

Full suite of support and troubleshooting services for business applications, including Microsoft Office, Adobe and more. We maintain and monitor software performance to keep your systems up to date and running smoothly.

CLOUD IDENTITY MANAGEMENT

Centralized platforms help businesses manage user access across different systems. We fully administer Office 365, Entra (Azure) Active Directory, group policy administration and Intune device management, including mobile devices.

VENDOR MANAGEMENT

Outsource IT vendor engagement, relationship management and vetting services. We deliver suitable computers, warranties, end-of-life device upgrades and maintenance plans.

DATA SECURITY

From phishing testing programs and end-user security training to system backup support and disaster recovery, we provide antivirus protection to ensure secure endpoint management and monitoring.
